

Name: Gregg Lipp

Role: VP Engineering and Facilities

RNDC Work Location: Tampa, FL

Date of Hire: 2/5/2020

Why is environmental sustainability important to you?

I believe we should take any opportunity we have to positively impact the world we live and work in.

How do you contribute to reducing your environmental impact – personal and/or professional? What areas of impact or organizations are you most passionate about?

I have responsibilities over all the facilities for RNDC, both existing buildings and any new ones we build. Incorporating the latest energy efficient materials in new buildings will help reduce our energy consumption, which in turn reduces our carbon footprint.

Why is having the Green Team important and why did you volunteer to be one of the group leaders?

In my role I can have a direct impact not only in how our new buildings are designed and built, but how our existing ones continue to operate.
